

TripleCross - Beginner Puzzle #34

This puzzle is like a crossword, but with numbers. Each digit occupies a hexagonal cell and can be a part of a "word" in the across, up, and down directions.

Rules:

- "Words" may not start with a zero.
- "Words" in the 'across' direction read from left to right.
- "Words" in the 'up' direction read along the upward diagonal to the right.
- "Words" in the 'down' direction read along the downward diagonal to the right.
- There is one unique solution which satisfies all the clues given below.
- Some "words" may not have clues. They will be determined by the "words" which intersect them.

Across

- Forty-two more than 5 up
- Consecutive digits in ascending order

Up

- Twice the result of 1 across minus 3 down
- Mean of 4 across and 2 down

Down

- Consecutive digits in descending order
- Twenty-one times a square

Solution:
