

TripleCross - Beginner Puzzle #41

This puzzle is like a crossword, but with numbers. Each digit occupies a hexagonal cell and can be a part of a "word" in the across, up, and down directions.

Rules:

- "Words" may not start with a zero.
- "Words" in the 'across' direction read from left to right.
- "Words" in the 'up' direction read along the upward diagonal to the right.
- "Words" in the 'down' direction read along the downward diagonal to the right.
- There is one unique solution which satisfies all the clues given below.
- Some "words" may not have clues. They will be determined by the "words" which intersect them.

Across

- Twenty-three times a prime number
- Sixty-two times a prime number
- Three times a prime number
- Cube root of 16 up
- Consecutive digits in descending order
- Fifteen thousand six hundred fourteen less than 18 up
- Thirty-nine times a prime number
- 18 up divided by 21 up

Up

- Seventeen times a square
- Seven times 14 down
- Mean of 13 across and 1 across
- 4 down cubed
- Two-thirds of 21 up
- A palindrome
- Mean of 4 across and 6 down
- Three times a prime number

Down

- Thirty times a prime number
- 15 across plus half of 2 down
- Same as 11 across
- Eighty-nine times a prime number
- Twenty-two times a prime number
- Eleven thousand twenty-four less than 18 up
- One-sixth of 3 up
- A prime number

Solution:
